## **The City of Torrington offers efficiency incentive for attic insulation**

The City of Torrington, in partnership with its wholesale electric power supplier, the Municipal Energy Agency of Nebraska, (MEAN) provides a financial incentive for upgrading attic insulation to residential homes.

The Attic Insulation Program provides cash incentives of \$0.15/per square foot with a maximum incentive of \$300 per existing residential dwelling for attic insulation. Information regarding upgrading insulation in a residential home can be found at the U.S. Department of Energy's website: [www.energy.gov](http://www.energy.gov).

The program is one of four energy efficiency programs offered through The City of Torrington in partnership with the MEAN. Each program provides cash incentives from MEAN for homeowners to make energy efficient upgrades.

The other three programs include:

### **Smart Thermostat Program**

Provides a cash incentive of up to \$100 paid directly to residential customers to help cover the cost of installing a qualifying smart thermostat.

### **Cooling System Tune-Up Program**

Provides a \$30 cash incentive to residential homeowners who have their cooling system tuned up by a HVAC contractor, regardless of what type or age of cooling system (air conditioner/air or water source heat pump).

### **Commercial LED Lighting Program**

Provides cash incentives paid directly to commercial customers to help cover the cost of lighting upgrades and replacements. (Project must be pre-approved.)

All four programs are available to customers of the City of Torrington. For more information on each program, contact the City of Torrington @ 532-5666 ask for Dennis Estes or go to [www.nmppenergy.org/mean](http://www.nmppenergy.org/mean) to download program guidelines and application forms.
